Ministry of Science & Technology, Government of India including the Corporate R&D set up.</p> <p>(iv) Responsible for Process & Product Development, Diversification for Production of Value Added Items, Setting up New Downstream Plants from Concept to Commissioning, Waste Utilization, Energy Conservation, Selection of New Technology, Technology Development, Technology Operation, Technology Absorption, Assimilation & Upgradation and Marketing of Technology have been the key areas of activities.</p> <p>(v) Undertaking Collaborative R&D Projects (Joint Research Projects) with National & International R&D/Industrial Organizations both in the Laboratory & Pilot Plant Scales have been the principal focus areas of activities. Collaborations with large number of CSIR laboratories; IIT, Kharagpur and many Industrial Houses have culminated in development of scores of new process & products which have been patented to the best advantage of NALCO. Collaborations with VAMI, St. Petersburg; TPE, GIREDMET, MISA, Moscow, Russia and NLM/JFEST, Japan have yielded noteworthy results in many areas of Scientific & Technological Collaborations.</p> <p>(vi) The most Important and Noteworthy Achievement have been the Development of Detergent Grade Zeolite-A Process Technology both in the Laboratory & Pilot Plant Scales in collaboration with CSMCRI, Bhavnagar, Gujarat and its Successful Commercialization to a 10,000 TPA Zeolite-A Plant at NALCO's Alumina Refinery, Damanjodi at an investment of Rs.30 Crores. Zeolite-A Plant was set up directly in the loop of NALCO's Alumina Refinery which is considered as the only plant of its kind in the world using Sodium Aluminate Liquor as the main feed stock material. NALCO's Zeolite-A Plant is considered as my brain child for which I have been bestowed with many Awards & Recognitions both Nationally &</p> |

| | | <p>Internationally. The Process has been patented in France, Germany, Australia, China, Russia including India. Marketing of Zeolite-A Technology both in the country and abroad has been taken up.</p> <p>(vii) Utilization of Red Mud, Fly Ash & Spent Pot Lining Materials, the waste products generated by the Company, has been the prime area of concern. Large number of value added products has been developed out of the same and products were exhibited in National Level Exhibitions. A good number of entrepreneurs have shown interest for purchase of the Technology for Commercialization.</p> <p>(viii) Full-fledged Technological Endeavors for Setting up of a Commercial Scale Gallium Plant (7TPA , 5N Grade, 99.999% Purity) in NALCO, Damanjodi using Spent Liquor of Alumina Refinery process stream as the Principal Raw Material was undertaken by the Company which was considered as a major milestone of R&D activities in the country. . Overseas technological collaborations with NLM/JFEST, Japan had yielded successful results. I was working in this project as the Principal Coordinator from NALCO and was responsible for realization of the project. In this connection, I have visited USA, Russia & Japan and have seen & worked in Gallium Plants in those countries and have gathered vast Scientific & Technological knowledge on the subject. A Techno-Economic Feasibility Report (TEFR) & a Detailed Project Report (DPR) was prepared for the purpose. Repeated Laboratory Scale & Pilot Scale Trials were conducted both at NALCO & M/s NLM, Japan and Project Feasibility was established.</p> |
